

Secure Check Signing and MICR Check Printing with Wycom WyPayments

WyPayments provides secure, efficient check signing leveraging your current software and printers. This advanced software solution interfaces with your accounting system, making it simple and secure to sign and print checks on your network printers. Whether you use pre-printed stock or blank secure check paper, WyPayments turns your printers into secure check signers or MICR check printers.

Simple to Use

Your signature resources and account programming reside securely on the WyPayments check signing system. To have checks signed and printed in one fast, easy step, just activate the WyPayments system with a secure username and password and choose your account programming. WyPayments retains all check disbursements on an internal audit log, making it easy to research and find check disbursements later.

Secure

WyPayments offers security features that can allow you to maintain control over check disbursement, while keeping the process efficient. Secure amount protection and graphical signature background features reduce the risk of amount alterations and signature forgeries. You can suppress signatures for checks over a specified dollar amount, ensuring they're reviewed before they are manually signed. An optional check log details each printed check and links to non-negotiable .PDF digital copies of all checks.

Reap the Benefits

WyPayments improves check signing and printing by delivering these valuable advantages:

- Secure, browser-based login for administrators, supervisors and users
- Complete control over user access to accounts
- Digital image archive option that stores non-negotiable .PDF check images
- One-click access to view .PDF check images
- Advanced security through custom graphics for dollar prefixes and amounts, signature suppression and graphical signature backgrounds
- Ability to add more printer licenses as needed
- MICR Laser Check Printing option (see reverse side for details)
- Simple setup – no software changes required

For a full list of WyPayments features and specifications, see reverse side.

Pre-printed or blank secure check stock: you choose.

Use WyPayments to sign your pre-printed checks, or use the MICR option to securely and efficiently print checks using secure blank check stock!

WyPayments Specifications

Check Signing Features:

- Offers easy-to-use browser-based secure log-in for enhanced security
- Secure log-in enables remote check printing
- Automatically prints and signs checks in a single pass directly off the printer
- Signature titles and backgrounds available
- Offers optional forgery-resistant graphical protected amount while printing
- Supports unlimited account types
- Provides a detailed check log including the date, check number, payee and an optional .PDF image archive and built in search application (optional)
- Counts signed checks, voided checks, or all checks
- Logical amount security limits (e.g. add signature at amount, suppress signature at amount, void at amount)
- Saves time and offers greater efficiency
- Securely produces manual checks if your computer system goes down
- Eliminates signature plates, rubber stamps and mechanical check signers

MICR Laser Check Printing Features (optional):

- Prints more securely by using blank secure check stock instead of pre-printed check stock
- Adds forms, graphics, logos, signatures and MICR information
- Able to create non-negotiable .PDF check copies and archive all check disbursements (optional)
- Can print non-negotiable check copies
- .PDF image files can be indexed for import into most imaging platforms (optional)
- Operates with HP-compatible laser printers
- Eliminates the need for separate check stock for each bank account
- Prints a MICR line which meets ABA specifications (with MICR toner cartridge)
- Supports company and bank logos, forms, and graphics
- Can print check copies with "COPY" in place of signature and "NON-NEGOTIABLE" in MICR line
- Secure blank check stock can be pulled from alternate trays
- Prints check numbers (even for customers who do not send check numbers)
- Check numbers are always in sequence
- No checks to void when printer jams
- Autosense automatically recognizes which check form to print

Compatibility:

- No computer hardware or software changes required
- Multiple printer support available
- Works with any HP-compatible printer
- Compatible with the MICR Laser Check Printing option

Standard WyPayment Pricing Includes:

- 1 signature
- 1 check account/application (e.g. payroll, accounts payable, etc.)
- 90-day factory warranty
- 1 printer license
- Additional signatures, custom logo prefixes, printer licenses, applications, and MICR Laser Check Printing are available for an additional charge.
