- *Check outline design (1) per your requirements (additions optional)*

- *Use with multiple accounts*

- *Password access control*

- *Includes installation on 1 PC*

- *Prints to any PCL5e printer (1 included)*

ABC *Affordable High-Security Check Printing Software*

SecureCheck 8 Basic is designed for small to medium-size businesses to provide a simple, affordable, and highly secure solution for MICR check printing and signing. Compatible with virtually any accounting application, including Quickbooks, Sage 50, and Netsuite, SecureCheck 8 Basic allows you to easily print accounts payable and payroll checks to blank stock for multiple checking accounts to any PCL5e printer in your office.
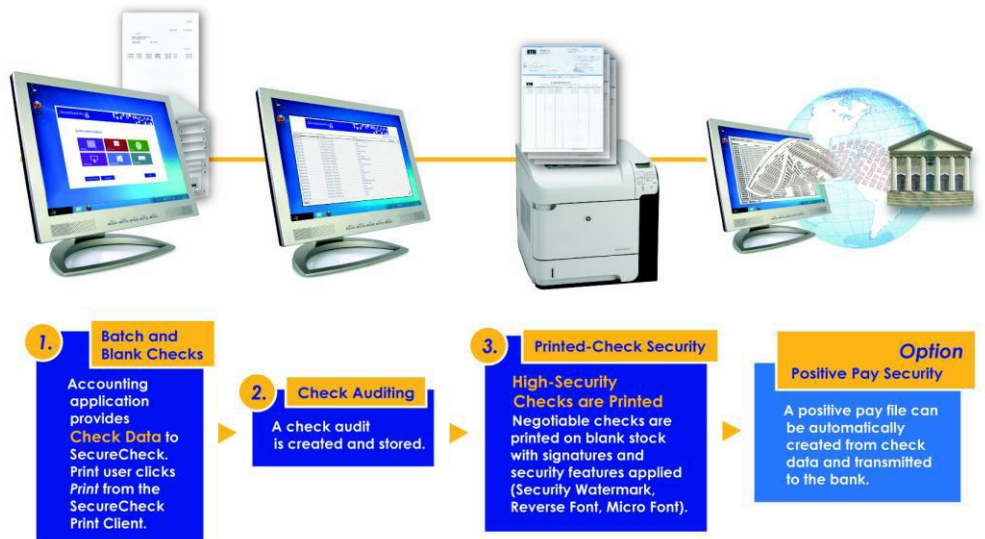

Checks are printed with with signatures, overlay graphics, and check data in a single pass. As checks are processed, a secure audit trail is generated. Signature logic applies the correct number of signatures on each check based on the check amount, and printed check-security features, including a security watermark and specialized security fonts, can be applied based on audited check data. System access to print checks and review audit and event logs is protected through a secure login, and all signatures and check forms are stored in an encrypted format, to ensure strong internal controls and security for your disbursement process.

Compatible with Windows operating systems (including Windows 7 / 8, 32- and 64-bit), SecureCheck Basic comes complete with system installation and training, creation of one check outline (applicable to multiple accounts), and a 1-year maintenance contract.

Easy-to-Use Check Printing and Signing Software

SecureCheck 🔒 *Basic*

CHECK ISSUANCE PROCESS

1. Batch and Blank Checks
Accounting application provides **Check Data** to SecureCheck. Print user clicks *Print* from the SecureCheck Print Client.

2. Check Auditing
A check audit is created and stored.

3. Printed-Check Security
High-Security Checks are Printed
Negotiable checks are printed on blank stock with signatures and security features applied (Security Watermark, Reverse Font, Micro Font).

Option
Positive Pay Security
A positive pay file can be automatically created from check data and transmitted to the bank.

AP TECHNOLOGY

Secure Payment Solutions

SecureCheck 🔒 Basic Features

Check Printing Flexibility and Savings

SecureCheck adds savings and ease to your disbursement process with flexible overlay design and single-pass check signing capabilities.

🖥 Intuitive, User-Driven Interface

Intuitive interface provides ease-of-use for all printing and system administration tasks.

🖧 Multiple Checking Accounts

AP Technology will design and pre-load a form outline for your checks (Additional form outlines are optional.). This check outline can be used to create overlays for multiple accounts. Check overlays offer 12 text objects and 7 graphic objects per form, and modifications to overlays are easily made from within the check setup screen.

🖳 Check Set-up Viewer

Viewer provides WYSIWYG capabilities to view check data locations and create a real-time audit map.

✒ Signature Logic

Define how many signatures (one, two or no signatures) are printed on each check based on check amount. SecureCheck Basic includes 1 signature file (additons are optional). Each check overlay can have its own logic pattern.

Advanced Check Printing Security

Advanced security features enhance internal controls and fraud prevention in your check issuance process.

▦ Audit Trail

The system audit log retains a record of all printed checks, including check number, date, account overlay, payee, amount, user, printer, zip, and 5 custom fields.

▦ Event Log

The event log tracks all user and system activity: user logins, check outline modifications, check printing activity, and more.

▱ Security Watermark

Print a security watermark across the face of your checks. The watermark contains the payee name and amount, with customizable settings for line spacing, pitch, and grayscale.

▤ Security Fonts

For greater security, print the check amount in *Reverse Font* or *Micro Font* in a second location on your checks.

🔖 Password-Login Security

System access to check printing, auditing and signature functionality is password/login protected.

Options

Enhance SecureCheck Basic with additional:

- Client workstations
- Printers
- Check or office form outlines
- Signatures or logos
- Positive Pay file creation and delivery automation

Note: Signatures and logos included with SecureCheck Basic must be implemented at the time SecureCheck is installed.

System Specifications

Host PC

1 GHz or higher processor clock speed recommended

Operating System:
Windows XP / XP Pro / Vista (w/ Service Pack 2) / 7 / 8 and Windows Server 2003 / 2008 /2012

1 G of RAM or higher

Minimum Disk Space: 100 MB + at least 10% free hard drive space after the install.

Monitor: Super VGA (1024x768) or higher-resolution video adapter and monitor

Database: MS SQL Server 2005 / 2008 / 2012 - If you already own a license, SecureCheck will use it; otherwise, the Express Edition of SQL Server 2005 / 2008 / 2012 will be deployed.

Client PC

Operating System:
Windows XP /Vista (w/Service Pack 2) / 7 / 8 and Server 2003 / 2008 / 2012

Print Stream

Generic Text - ASCII, Windows driver printing (.emf), and SecureCheck Data Format (.csv)

Printer Compatibility

Software-Only Configuration:
PCL 5e-compatible laser printers, including Hewlett Packard, Lexmark, Canon, and many more.

Software-Firmware Configuration: Contact AP Technology for an HP LaserJet compatible printer list.
