

SEM iWitness

Audit-Friendly Media Tracking End-of-Life Documenting Solution

Global Leader in High Security Information
End-of-Life Solutions for Over 50 Years

About iWitness

The SEM iWitness is a plug and play, end-of-life documentation tool for IT destruction. The iWitness software records the media and documents the erasure status, after which the information can be exported to a cross-compatible CSV file and saved to a CDR (not included) or USB drive. The iWitness not only keeps an audit trail but also prompts the operator through the process so no step is missed. iWitness software records manufacturer, model, serial number, destruction method and device used, operator name, and date. In addition, iWitness can be customized to record additional information. The iWitness complies with NIST SP 800-36/NIST SP 800-88, PCI DSS, HIPAA, PIPEDA, GLBA, CCPA, and FCC standard.

iWitness Software System Bundle:

- A** Laptop with 15" screen and SSD for increased speed and reliability
- B** Preloaded iWitness software
- C** Handheld barcode scanner

Compatibility

- Degaussers: SEM Models EMP1000 and EMP1000-HS high security
- SEM's entire line of HDD and SSD crushers, shredders, and disintegrators
- Separate SKUs based on TAA compliant government version (iWitness) or commercial (iWitness-comm).
